**PRODUCT DATA SHEET****PRODUCT BRASSLAC ACRYLIC LACQUER****CODE DS24**

**USAGE** A clear gloss, acrylic lacquer formulated to give a tarnish resistant finish to copper, copper alloys, brass and bronze. Brasslac can be used with our acrylic range of metallic paints, to preserve the natural metallic colour on exterior exposure.

**METHOD OF APPLICATION** Dip, Spray or Brush

**COVERAGE** Approximately 15 square metres per litre

**DRYING TIME** 30 minutes (Touch Dry) **HARD DRY** 1 hour (Dependent on conditions)

**PAC. SIZE:** 500 ml, 1, 2.5 and 5 litres

**SHELF LIFE:** Minimum 12 months unopened

**FLASHPOINT:** Above 32°C

**FINISH** Gloss

**COLOUR RANGE** Clear

**THINNERS** White Spirit

**CLEANER** E30 Gun Cleaner/White Spirit

**FURTHER INFORMATION**

Being a thermoplastic, Brasslac is not recommended for materials or items that may be continuously handled. Under these conditions the product will become soft. When Brasslac is used to overcoat acrylic based metallics it must be laid on rather than brushed out. This will avoid reworking of the metallic paint by the overcoat. Brasslac is also available in a flame retardant grade.

Dust with a soft dry cloth, avoid the use of solvent based cleaning products.

**SPECIFICATION :**

**UNTREADED METALS:** Ensure a clean surface by the use of our Degreasing and Dewaxing solution. Apply one or two coats of Brasslac, allowing to dry between coats. This is NOT suitable for ferrous metals as Brasslac does not contain a rust inhibitor.

**PAINTED METALLIC SURFACES:** Ensure that metallic paint is fully dry. Apply one or two coats of Brasslac (see further information section) and allow to dry between coats.

**PREVIOUSLY PAINTED SURFACES:** GLOSS FINISH (i.e. Signs) must be lightly sanded to provide a key. Apply one or two coats of Brasslac. Allow to dry between coats. If in doubt of compatibility between painted surface and Brasslac, a test area is always advisable.
